Music Therapy

NeuroRhythm specializes in **developmental and neurological** challenges including **autism spectrum disorder** and other **cognitive**, **speech/language and motor delays**. We are a research-based behavioral music therapy practice, and the **only** company that integrates the scientific fields of **Neurologic Music Therapy (NMT)** with **Applied Behavior Analysis (ABA)**.

Music therapy is an established allied healthcare profession in which music is used within a therapeutic relationship by a Board Certified Music Therapist (MT-BC) to address the physical, cognitive, communication, social and emotional needs of individuals of all ages.

Neurologic Music Therapy (NMT) is the therapeutic use of music to address the cognitive, speech/language, and sensorimotor function of individuals with neurological diseases or disorders. Treatment techniques are based on a neuroscience model and the influence of music on functional changes in the brain and behavior.

Music Therapy for Social, Emotional and Behavioral Needs

Music therapy provides a nonthreatening and structured environment in which individuals have the opportunity to develop improved social, emotional and behavioral skills.

Music is highly motivating and engaging and may be used as a natural reinforcer for desired responses.

Music Therapy Improves

- socially appropriate behavior
- motivation
- participation
- shared play
- turn taking
- reciprocity
- listening and responding to others
