# Music Therapy

NeuroRhythm specializes in **developmental and neurological** challenges including **autism spectrum disorder** and other **cognitive, speech/language and motor delays**. We are a research-based behavioral music therapy practice, and the **only** company that integrates the scientific fields of **Neurologic Music Therapy (NMT)** with **Applied Behavior Analysis (ABA)**.

Music therapy is an established allied healthcare profession in which music is used within a therapeutic relationship by a **Board Certified Music Therapist (MT-BC)** to address the **physical, cognitive, communication, social and emotional** needs of individuals of all ages.

Neurologic Music Therapy (NMT) is the therapeutic use of music to address the **cognitive, speech/language, and sensorimotor** function of individuals with neurological diseases or disorders. Treatment techniques are based on a neuroscience model and the influence of music on functional changes in the **brain and behavior**.

## Music Lessons for Success

Music therapists are trained to understand a wide variety of disabilities and medical conditions as well as how to **adapt methods** to best meet the individual's needs so that **optimal learning and success** can take place.

Our instructional methods are adapted to the individual's learning style, functioning level, strengths and needs, and lessons are usually incorporated into music therapy sessions.
